## PROFESSIONAL SUMMARY

---

Motivated Computer Science undergraduate with hands-on experience building full-stack web applications using the MERN stack. Proficient in React, Node.js, Express, and MongoDB with working knowledge of RESTful API design, JWT authentication, and cloud integrations. Eager to apply practical development skills in a collaborative internship environment.

## EDUCATION

---

### Bachelor of Technology — Computer Science & Engineering | 2023 – 2027

Swami Vivekananda University, West Bengal | CGPA: 8.2 / 10

- Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming
- Actively solving Data Structures & Algorithms problems on LeetCode

## TECHNICAL SKILLS

---

**Languages:** JavaScript (ES6+), Java, HTML5, CSS3

**Frontend:** React.js, React Context API, React Router, Tailwind CSS, Responsive Design

**Backend:** Node.js, Express.js, REST API Design, JWT Authentication, Google OAuth 2.0, Nodemailer

**Database & Cloud:** MongoDB, Mongoose ODM, MongoDB Atlas, Cloudinary

**Tools & Platforms:** Git, GitHub, VS Code, Postman, Render, Vercel, npm

**Soft Skills:** Team Collaboration, Clear Written Communication, Problem-Solving, Quick Learner

## PROJECTS

---

### Siksha — Full-Stack Academic Notes Platform | Jan 2025 – Present

MERN Stack | JWT | Google OAuth | Cloudinary | Nodemailer | [github.com/divya240918/siksha](https://github.com/divya240918/siksha)

- Designed and built a role-based notes-sharing platform for students and admins, with school-scoped access control using custom Mongoose middleware
- Implemented JWT authentication alongside Google OAuth 2.0 login, OTP-based email verification via Nodemailer, and bcrypt password hashing
- Built a Study Timer with streak tracking, session history persisted in localStorage, and motivational milestone notifications
- Integrated Cloudinary for secure file uploads (PDFs, images) and developed a Deadline Tracker and Notice Board with real-time class-filtered data
- Deployed backend on Render and frontend on Vercel; resolved production issues including Linux filename case-sensitivity conflicts and environment variable management with dotenvx
- Collaborated using Git with feature-branch workflow, conducting code reviews and resolving merge conflicts across a 2-person team

### Weather App | Oct 2024

JavaScript | REST API | HTML | CSS | [github.com/divya240918/Weather-App](https://github.com/divya240918/Weather-App)

- Built a responsive weather application consuming the OpenWeatherMap API, displaying real-time temperature, humidity, and weather conditions by city search
- Implemented error handling for invalid city names and network failures, improving application reliability

### Tic-Tac-Toe Game | Sep 2024

JavaScript | HTML | CSS | [github.com/divya240918/Tic-Tac-Toe](https://github.com/divya240918/Tic-Tac-Toe)

- Developed a browser-based two-player Tic-Tac-Toe game with win detection, draw detection, and a reset mechanism
- Applied DOM manipulation and event-driven programming to create a smooth and interactive user experience

## **ACHIEVEMENTS & ACTIVITIES**

---

- Solved multiple problems on LeetCode, focusing on arrays, strings, recursion, and linked lists
- Completed full-stack MERN development independently, building and deploying a production-grade application from scratch
- Consistently maintained academic performance with CGPA above 8.0 across all semesters
- Demonstrated self-learning ability by integrating third-party services (Cloudinary, Google OAuth, Nodemailer) without formal training
